1. Introduction

BoostSolutions Business Charts provides a quick and convenient way to create insightful business charts in a SharePoint Web Part or directly in SharePoint list. Business Charts supports multiple popular external databases that can be used as the data source. 8 types of charts are available to fulfill your different business requirements.

The user guide is used to instruct the users to configure and use this product.

For the latest copy of this and other guides, please visit the link provided:

<https://www.boostsolutions.com/download-documentation.html>

2. Installation

2.1 Product Files

After you download and unzip the Business Charts zip file from www.boostsolutions.com, you will find the following files:

Path	Descriptions
Setup.exe	A program that installs and deploys the WSP solution packages to the SharePoint farm.
EULA.rtf	The product End-User-License-Agreement.
Business Charts_V2_User Guide.pdf	User guide for Business Charts in PDF format.
Library\4.0\Setup.exe	The product installer for .Net Framework 4.0.
Library\4.0\Setup.exe.config	A file containing the configuration information for the installer.
Library\4.6\Setup.exe	The product installer for .Net Framework 4.6.
Library\4.6\Setup.exe.config	A file containing the configuration information for the installer.
Solutions\Foundation\ BoostSolutions.FoundationSetup15.1.wsp	A SharePoint solution package containing Foundation files and resources for SharePoint 2013 or SharePoint Foundation 2013.
Solutions\Foundation\ BoostSolutions.FoundationSetup16.1.wsp	A SharePoint solution package containing Foundation files and resources for SharePoint 2016 or SharePoint 2019/Subscription Edition.
Solutions\Foundation\Install.config	A file containing the configuration information for the installer.
Solutions\BusinessCharts\ BoostSolutions.BusinessCharts15.2.wsp	A SharePoint solution package containing Business Charts files and resources for SharePoint 2013 or SharePoint Foundation 2013.
Solutions\BusinessCharts\ BoostSolutions.BusinessCharts16.2.wsp	A SharePoint solution package containing Business Charts files and resources for SharePoint 2016 or SharePoint 2019/Subscription Edition.
Solutions\BusinessCharts\Install.config	A file containing the configuration information for the installer.

2.2 Software Requirements

Before you install Business Charts, ensure your system meets the following requirements:

SharePoint Server Subscription Edition

Operating System	Windows Server 2019 Standard or Datacenter Windows Server 2022 Standard or Datacenter
Server	Microsoft SharePoint Server Subscription Edition
Browser	Microsoft Edge Mozilla Firefox Google Chrome

SharePoint 2019

Operating System	Windows Server 2016 Standard or Datacenter Windows Server 2019 Standard or Datacenter
Server	Microsoft SharePoint Server 2019
Browser	Microsoft Internet Explorer 11 or above Microsoft Edge Mozilla Firefox Google Chrome

SharePoint 2016

Operating System	Microsoft Windows Server 2012 Standard or Datacenter X64 Microsoft Windows Server 2016 Standard or Datacenter
Server	Microsoft SharePoint Server 2016 Microsoft .NET Framework 4.6
Browser	Microsoft Internet Explorer 10 or above Microsoft Edge Mozilla Firefox Google Chrome

SharePoint 2013

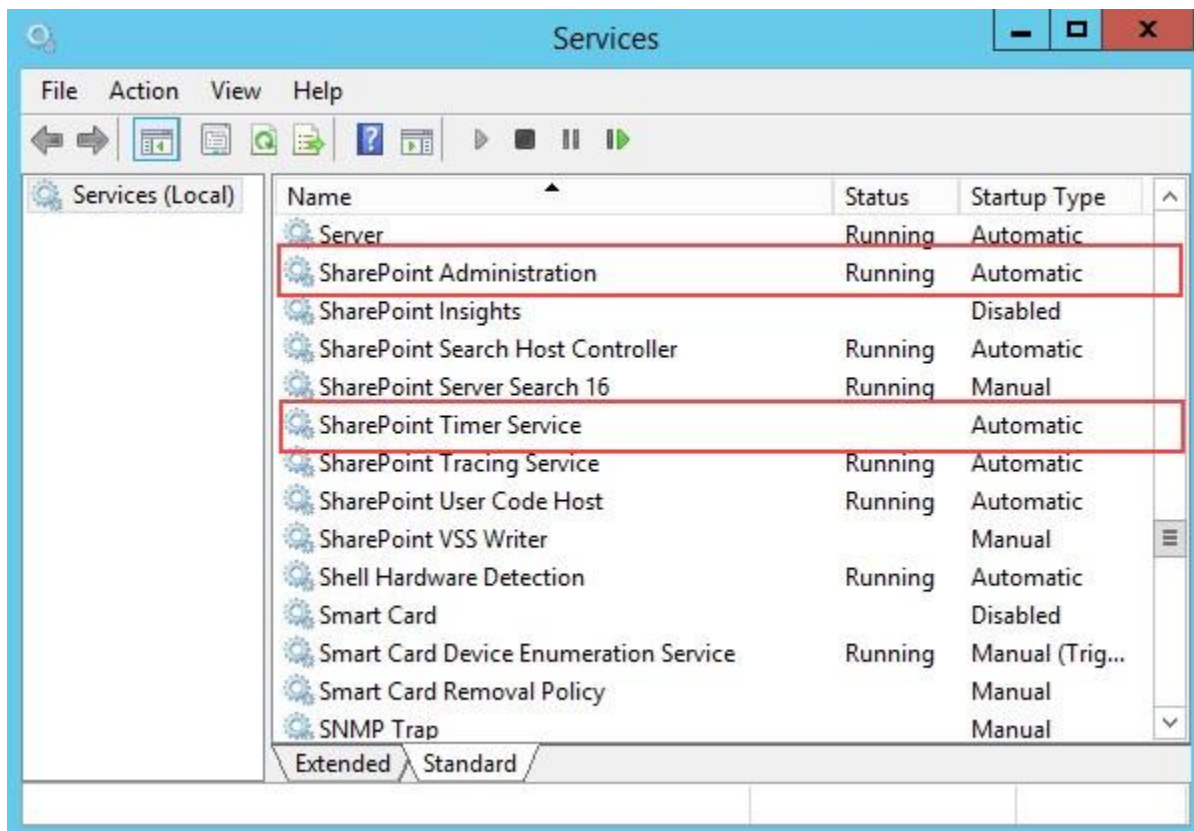

Operating System	Microsoft Windows Server 2012 Standard or Datacenter X64 Microsoft Windows Server 2008 R2 SP1
Server	Microsoft SharePoint Foundation 2013 or Microsoft SharePoint Server 2013 Microsoft .NET Framework 4.5
Browser	Microsoft Internet Explorer 8 or above Microsoft Edge Mozilla Firefox Google Chrome

2.3 Installation

Follow these steps to install Business Charts on your SharePoint servers.

Installation Preconditions

Before you start installing the product, please make sure these services are started on your SharePoint servers: **SharePoint Administration** and **SharePoint Timer Service**.

Business Charts must be run on one front-end Web server in the SharePoint farm where **Microsoft SharePoint Foundation Web Application services** are running. Check **Central Administration → System Settings** for a list of servers running this service.

Required Permissions

To perform this procedure, you must have specific permissions and rights.

- Member of the local server's **Administrators** group.
- Member of the **Farm Administrators** group.

To install Business Charts on SharePoint server.

- a. Download the zip file (*.zip) of the product of your choice from the BoostSolutions website, then extract the file.
- b. Open the created folder and run the **Setup.exe** file.

Note If you cannot run the setup file, please right click the **Setup.exe** file and choose Run as administrator.

- c. A system check is performed to verify if your machine meets all the requirements for installing the product. After the system check is finished, click **Next**.
- d. Review and accept the End-User License Agreement and click **Next**.
- e. In the **Web Application Deployment Targets**, select the web applications you are going to install and click **Next**.

Note If you select **Automatically activate features**, the product features will be activated in the target site collection during the installation process. If you want to manually activate the product feature later, uncheck this box.

- f. Upon completion of the installation, details are displayed showing which web applications you product has been installed to. Click **Close**.

2.4 Upgrade

Download the latest version of our product and run the **Setup.exe** file.

In the **Program Maintenance** window, select **Upgrade** and click **Next**.

2.5 Uninstallation

If you want to uninstall the product, double-click the **Setup.exe** file.

In the **Repair or Remove** window, select **Remove** and click **Next**. Then the application will be removed.

2.6 Command_Line Installation

The following instructions are for installing the solution files for Business Charts in SharePoint 2016 by using the SharePoint STSADM command line tool.

Required permissions

To use STSADM, you must be a member of the local Administrators group on the server.

To install Business Charts to SharePoint servers.

If you have installed BoostSolutions products before, please skip the steps for the installation of Foundation.

- a. Extract the files from the product zip pack to a folder on one SharePoint server.
- b. Open a command prompt and make sure your path is set with the SharePoint bin directory.

SharePoint 2013

C:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\16\BIN

- c. Add the solution files to SharePoint in the STSADM command line tool.

```
stsadm -o addsolution -filename BoostSolutions.BusinessCharts16.2.wsp
stsadm -o addsolution -filename BoostSolutions.FoundationSetup16.1.wsp
```

- d. Deploy the added solution with the following command:

```
stsadm -o deploysolution -name BoostSolutions.BusinessCharts16.2.wsp -allowgacdeployment -url
[virtual server url] -immediate
stsadm -o deploysolution -name BoostSolutions.FoundationSetup16.1.wsp -allowgacdeployment -
url [virtual server url] -immediate
```

- e. Wait for the deployment to complete. Check the final status of the deployment with this command:

```
stsadm -o displaysolution -name BoostSolutions.BusinessCharts16.2.wsp
stsadm -o displaysolution -name BoostSolutions.FoundationSetup16.1.wsp
```

The result should contain a <Deployed> parameter for which the value is TRUE.

- f. In the STSADM tool, activate the features.

```
stsadm -o activatefeature -name BoostSolutions.BusinessCharts -url [site collection url] -force
```

Note:

After install product using command line, you can check whether the product is installed and deployed successfully in Central Administration.

- a. On the Central Administration Home page, click **System Settings**.
- b. In the Farm Management section, click **Manage farm solutions**.
- c. On the Solution Management page, check whether the solution "boostsolutions.businesscharts16.2.wsp" is deployed to the web applications.
- d. On the Solution Properties page, click **Deploy Solution**.
- e. On the Deploy Solution page, in the Deploy When section, select **Now**.
- f. In the Deploy To? section, in the A specific web application list, click either All web applications or select a specific Web application.
- g. Click **OK**.

To remove Business Charts from SharePoint servers.

- a. Removal is initiated with the following command:

```
stsadm -o retractsolution -name BoostSolutions.BusinessCharts16.2.wsp -immediate -url [virtual server url]
```

- b. Wait for the removal to finish. To check the final status of the removal you can use the following command:

```
stsadm -o displaysolution -name BoostSolutions.BusinessCharts16.2.wsp
```

The result should contain the <Deployed> parameter for which the value is FALSE and the <LastOperationResult> parameter with the RetractionSucceeded value.

- c. Remove the solution from the SharePoint solutions storage:

```
stsadm -o deletesolution -name BoostSolutions.BusinessCharts16.2.wsp
```

Note:

After uninstall product using command line, you can check whether the product is removed and successfully in Central Administration.

- a. On the Central Administration Home page, click **System Settings**.
- b. In the Farm Management section, click **Manage farm solutions**.
- c. On the Solution Management page, click "boostsolutions.businesscharts16.2.wsp".
- d. On the Solution Properties page, click **Retract Solution**.
- e. On the Retract Solution page, in the Deploy When section, select **Now**.
- f. In the Retract From section, in the A specific web application list, click All content web applications.
- g. Click **OK**.
- h. Wait a minute, and refresh the browser until you see "Not Deployed" as the status for boostsolutions.businesscharts16.2.wsp.
- i. Select "boostsolutions.businesscharts16.2.wsp".
- j. On the Solution Properties page, click **Remove Solution**.

To remove BoostSolutions Foundation from SharePoint servers.

The BoostSolutions Foundation is designed to provide a centralized interface to manage licenses for all BoostSolutions software from within SharePoint Central Administration. If are still using BoostSolutions product on your SharePoint server, DO NOT remove Foundation from the servers.

- a. Removal is initiated with the following command:

```
stsadm -o retractsolution -name BoostSolutions.FoundationSetup16.1.wsp -immediate -url  
[virtual server url]
```

- b. Wait for the removal to finish. To check the final status of the removal you can use the following command:

```
stsadm -o displaysolution -name BoostSolutions.FoundationSetup16.1.wsp
```

The result should contain the <Deployed> parameter for which the value is FALSE and the <LastOperationResult> parameter with the RetractionSucceeded value.

- c. Remove the solution from the SharePoint solutions storage:

```
stsadm -o deletesolution -name BoostSolutions.FoundationSetup16.1.wsp
```

Note:

After uninstall product using command line, you can check whether the product is removed and successfully in Central Administration.

- a. On the Central Administration Home page, click **System Settings**.
- b. In the Farm Management section, click **Manage farm solutions**.
- c. On the Solution Management page, click "boostsolutions.foundationsetup16.1.wsp".
- d. On the Solution Properties page, click **Retract Solution**.
- e. On the Retract Solution page, in the Deploy When section, select **Now**.
- f. In the Retract From section, in the A specific web application list, click All content web applications.
- g. Click **OK**.
- h. Wait a minute, and refresh the browser until you see "Not Deployed" as the status for "boostsolutions.foundationsetup16.1.wsp".
- i. Select "boostsolutions.foundationsetup16.1.wsp".
- j. On the Solution Properties page, click **Remove Solution**.

2.7 Feature Activation

Activate features in site collection

By default, the application's features are automatically activated once the product is installed. You can also activate the product feature manually.

- a. Select Settings  and then select **Site Settings**.
- b. Under **Site Collection Administration** click **Site collection features**.
- c. Find the application feature and click **Activate**. After a feature is activated, the Status column lists the feature as **Active**.

BoostSolutions Business Charts 2.3.1.611

Visually represent data in various charts to help users to track and analysis business data. (Powered by BoostSolutions)

Active

3. About Business Charts

Business Charts gives you an easy way to manage your business data with charts. You can create charts in the web part or analyze list data directly in every individual list.

3.1 Business Charts Web Part

The Business Charts Web Part is just like the SharePoint Web Part, you can create it by inserting the web part in a page and connect it to the specified data source to create a chart, including SharePoint list, MS SQL and ORACLE.

Note End users who have **View Only** permission level for the site page can view charts that they created in the web part.

3.2 Business Charts Dialog

Business Charts gives you a flexible way to analyze business data directly in a list and you can view charts for the current list with a simple click on the Ribbon.

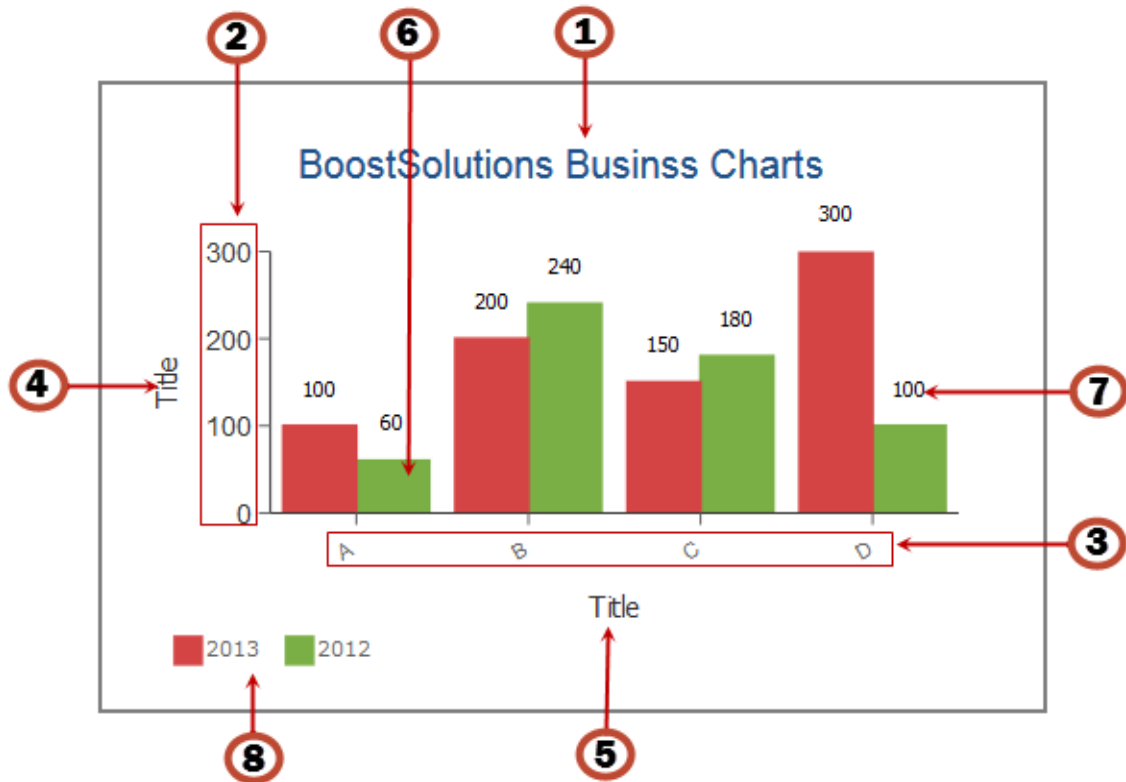

Product Analysis

Product Analysis

3.3 Chart Elements

Business Charts is composed of various elements such as Chart Name, Title, Axis, etc. The following image shows the common chart elements:

- ① Chart title.
- ② Value (Y) Axis: Associated with the values you selected in the Value (Y) Axis section.
- ③ Category (X) Axis: Associated with the values you selected in the Category (X) Axis section.
- ④ Value (Y) Axis Title: A short description of the Value (Y) Axis.
- ⑤ Category (X) Axis Title: A short description of the Category (X) Axis.
- ⑥ Chart Series: Visual representation of the individual values of a chart.
- ⑦ Label: Alpha-numeric representation of data values.
- ⑧ Legend: Icons with the data series names and colors.

3.4 Chart Types

Business Charts provides 8 types of charts (Column, Area, Line, Bar and Pie). You can easily change chart types from one type to another.

Chart Type	Description
<p>Bar chart</p> 	<p>A Bar Chart displays a sequence of vertical or horizontal bars of lengths proportional to the value that they represent. Bar charts are usually used for comparing two or more values or representing the contribution of each value to a total.</p>
<p>Line chart</p> 	<p>Line charts are usually used to show a trend or how a value contributes to a trend total (stacks).</p>
<p>Area chart</p> 	<p>Area charts are usually used for comparing two or more values or representing the contribution of each value to a total.</p>
<p>Pie chart</p> 	<p>A Pie Chart is a circular chart divided into sectors, where the arc length of each sector is proportional to the quantity it represents. Group by is not supported by pie charts.</p>
<p>Column chart</p> 	<p>A Column Chart is usually used for comparing two or more values or representing the contribution of each value to a total. The column chart is the default chart used in Business Charts.</p>
<p>Combo chart</p> 	<p>The Combo chart combines the features of the bar chart and line chart. A combo chart displays data series as a different marker type, such as column or line.</p>
<p>Scatter chart</p> 	<p>The Scatter chart displays data as a collection of points, each having the value of one variable determining the position on the horizontal axis and the value of the other variable determining the position on the vertical axis.</p>

Bubble chart

A bubble is similar as a scatter chart in which the data points are replaced with bubbles, and an additional dimension of the data is represented in the size of the bubbles.

4. Create a Chart

4.1 Create a Chart in List

Business Charts allows end users to create chart directly on list without adding any Web Parts. To complete this task and to view the chart you must have at least **Design** permission level in the current list.

- Enter the list which you want to create a chart for and click **Business Charts** under the **List** tab.

- If you use the product for the first time, a message may appear indicating that there is no chart on this list. Click **Start Now** or click  on the right top corner to create your first chart.

Business Charts

Charts: Charts(0) ▾

There is no chart on this list. [Start Now](#)

- On the **Basic Settings** panel, you need to configure the Chart Name, List View, Chart Type, Value (Y) Axis, Category (X) Axis and Group by (optional) options.

▼ Basic Settings

Chart Name *

List View

All Items ▼

< >

Value (Y) Axis *

Select one column you want to display for the y axis of the chart.

Select a column ▼ ORIGINAL ▼ +

Category (X) Axis *

Select one column you want to display for the x axis of the chart.

Select a column ▼

Group by

Specify a column by which to group data.

Select a column ▼

- d. In the **Chart Name** section, specify a name. This option is required.
- e. In the **List View** section, you can select one view to decide the data range you want to use to generate a chart. Personal view is not supported.
- f. Select one chart type according to your needs or business goals. There are 5 types of chart you can choose from: Column, Area, Line, Bar and Pie chart.
- g. In the **Value (Y) Axis** section, you can select a column or field to display on the y axis.

Value (Y) Axis *

Select one column you want to display for the y axis of the chart.

Total Amount ▼ SUM ▼ +

The drop-down only lists the columns contained in the selected view.

Supported columns: Single Line of Text, Yes/No, Choice, Number, Currency, Date and Time, Person or Group, Lookup, Cascaded Lookup, Cross-Site Lookup.

- h. In the **Value (Y) Axis** section, specify one function you want to apply to the values on the Y axis. To show the value of the column, select **ORIGINAL**.

SUM	Gets the total of all the values in the column.
AVERAGE	Calculate the average for the values in the column.
COUNT	Get the count of the records for a particular category.
MIN	Gets the smallest numeric value in the column.
MAX	Gets the largest numeric value in the column.

- i. In the **Category (X) Axis** section, select a column or field to display on the X axis.

Supported columns: Single Line of Text, Yes/No, Choice, Number, Currency, Date and Time, Person or Group, Lookup, Cascaded Lookup, Cross-Site Lookup.

Interval

If you specify the Data and Time field as the Category (X) Axis, you can optionally specify the date or time interval to display on the chart.

For this option you will need to select one function in the **Value (Y) Axis** section.

You can show the data by Hour, Day, Week, Month, Quarter or Year.

Interval

Hour

Day

Week

Month

Quarter

Year

- j. In the **Group By** section, specify a column by which to group data.

You can optionally summarize data values in groups using the Group by option. For example, if you want to compare the sales numbers for three products by month or by quarter then this is the best function to use.

Please note, if you want to use the Group by function, you must select a function (SUM, COUNT, MAX, MIN, AVG) in the **Value (Y) Axis** section.

Group by
Specify a column by which to group data.

Product Version

Supported columns: Single Line of Text, Yes/No, Choice, Number, Currency, Date and Time, Person or Group, Lookup, Cascaded Lookup, Cross-Site Lookup.

Interval

Once you select a Date and Time column in the **Group by** section, you can optionally group the data to a specified interval.

Interval

Hour

Day

Week

Month

Quarter

Year

Note: If you select a Date and Time column in the **Category (X) Axis** section and select **Month** or **Quarter** in the **Interval** section, a [**<Date and Time Column Name>_Year**] option will appear in the **Group by** dropdown list.

This column helps to compare your business data within the same month or quarter for all previous years.

To understand how to use this column to analyze your business data, please refer to section [10. Use Case](#) for details.

- k. Click the **Save Settings** button to save the configurations.
- l. Click the **Close Settings** button to close the setting panel.

4.2 Create Charts using the Business Charts Web Part

When you create charts using the Business Charts Web Part, you need to first add the Business Charts Web Part on your page and connect it to a data source. Then you can change the appearance of the chart.

Business Charts supports multiple popular external data systems as the data sources such as, Microsoft SQL Server 2000-2008 R2, Oracle Database and SharePoint 2010/2013/2016/2019/Subscription Edition.

4.2.1 Add a Business Charts Web Part

To add a Business Charts Web Part, you must have at least **Design** permission level.

- a. From any page, click on the **Settings** icon and choose **Settings** from the drop-down menu.
- b. Click on the page where you want to add the Web Part to and click the **Insert** tab followed by **Web Part**.
- c. Under Categories, select **BoostSolutions Web Parts** category. Next select Business Charts under the Web Parts section and click **Add**.
- d. Then click **Save & Close** to save the page.

4.2.2 Connect to a Data Source

After the Business Charts Web Part is added on page, you can connect it to the specified data source.

- a. Hover over the Business Charts Web Part to reveal the blue arrow on the top right corner of the web part. Click on the arrow to open a drop down menu and click on **Business Charts Settings**.

- b. In the **Business Charts Settings** page, expand the **Data Source** panel.
- c. In the **Data Source Type** section, select a data source type and configure the authentication.

Option	Description
SQL Server	Use this option to connect the web part to a SQL server database. Please see Connect to SQL Server .
ORACLE	Use this option to connect the web part to a oracle database. Please see Connect to ORACLE .
SharePoint 2010/2013/2016/2019/Subscription Edition	Use this option to connect the web part to a SharePoint list, including the same site collection or other site collections. Please see Connect to SharePoint List .

Connection successful.

- a. **Data Source Type:** Select a SQL Server as the external data type.
- b. **Database Server:** Enter the database server name or IP address.

- c. **Database Authentication:** There are two types of authentication, Windows Authentication and SQL Server Authentication.

Windows Authentication: Use the application pool account to access the database server.

To connect to a SQL Server using Windows authentication, you must identify the Windows identity under which your web application is running. You must also be sure that the identity has been granted access to the SQL Server database.

SQL Server Authentication: If you select this authentication, you need to enter a SQL user name and password to access the database.

To use this authentication, the Database Engine must use mixed mode authentication (**SQL Server and Windows Authentication mode**).

- **Username:** Enter a SQL user name. The user should have at least **Read** permission.
- **Password:** Enter the password.
- Click **Connect** button to connect to the database and populate the database dropdown list.
- **Database:** Select a database.

- d. **Data Settings:** Specify the data which you want to display on the chart.

- **Specify a Table/View and filter**

Specify a table or view to use as a filter or optionally enter a SQL WHERE clause to filter records that fulfill a specified criterion from a database table or view.

Data Settings:

Specify a table or view to filter data

- b. **Host Name/IP:** Enter a host name where the database is situated or the IP address of the server.
- c. **Port Number:** Enter the TCP/IP port number to connect to the database server (The default port number is 1521).
- d. **Service Name/SID:** Enter the Service Name/SID for the connection and select the corresponding radio button.
- e. **User Name:** Enter the user name. Ensure the user has at least **Read** permission to the database.
- f. **Password:** Enter the password.
- g. Click **Connect** button to connect to the database and populate the database dropdown list.
- h. **Database:** Select a database.

i. **Data Settings:** Specify the data which you want to display on the chart.

- **Specify a Table/View and filter**

Specify a table or view to use as a filter or optionally enter a SQL WHERE clause to filter records that fulfill a specified criterion from a database table or view.

- **Enter a SQL Clause to choose data**

Enter a SQL clause to filter data from the database you selected and then click **Validate** to check the statement.

Connect to a SharePoint List

The configuration for SharePoint 2010 and 2013/2016/2016/Subscription Edition are the same. We will use SharePoint 2013 as an example in this section.

You can enter a URL for the list from another farm and corresponding User Name and Password.

The screenshot shows a 'Data Source' configuration window. It has a title bar with a dropdown arrow and the text 'Data Source'. Below the title bar, there is a section for 'Data Source Type' with the instruction 'Specify the data source and authentication.' A dropdown menu is set to 'SharePoint2013'. Below this is a 'List URL:' field containing the text 'Product%20Center/Lists/Sales%20Order/AllItems.aspx'. There is a 'Username:' field with 'brfarm2013' and a 'Password:' field with ten dots. A 'Connect' button is at the bottom left. Below the button, the text 'Connection successful.' is displayed in green.

- a. **External Data Type:** Select SharePoint 2010 as the external data type.
- b. **URL:** Enter a SharePoint list URL.
- c. **User Name:** Enter a user name for a SharePoint2010 user. Ensure the user has at least **View only** permission for the target SharePoint list.
- d. **Password:** Enter the password.

- e. Click **Connect** button.

4.2.3 Create a Chart in the Web Part

Once you connect to a data source and select the data, you can create a chart in the web part.

To create a chart, you need to configure the following: Chart Name, Chart Type, Value (Y) Axis, Category (X) Axis and Group by (optional).

- In the **Business Charts Settings** page, expand the **Basic Settings** panel.
- In the **Chart Name** section, specify a name. This option is required.
- Select one chart type according to your needs or business goals. There are 5 types of chart you can choose from: Column, Area, Line, Bar and Pie chart.
- In the **Value (Y) Axis** section, you can select a column or field to display on the y axis.

Value (Y) Axis *

Select one column you want to display for the y axis of the chart.

Total Amount
 SUM

- In the **Value (Y) Axis** section, specify one function you want to apply to the values on the Y axis. To show the value of column, select ORIGINAL.

SUM	Gets the total of all the values in the column.
AVERAGE	Calculate the average for the values in the column.
COUNT	Get the count of the records for a particular category.
MIN	Gets the smallest numeric value in the column.
MAX	Gets the largest numeric value in the column.

- In the **Category (X) Axis** section, select a column or field to display on the X axis.

Interval

If you specify the Date and Time field as the Category (X) Axis, you can optionally specify the date or time interval to display on the chart.

For this option you will need to select one function in the **Value (Y) Axis** section.

You can show the data by Hour, Day, Week, Month, Quarter or Year.

Interval

Hour

Day

Week

Month

Quarter

Year

- g. In the **Group By** section, specify a column by which to group data.

You can optionally summarize data values in groups using the Group by option. For example, if you want to compare the sales numbers for three products by month or by quarter then this is the best function to use.

Please note, if you want to use the Group By function, you must select a function (SUM, COUNT, MAX, MIN, AVG) in the **Value (Y) Axis** section.

Group by

Specify a column by which to group data.

Product Version

Interval

Once you select a Date and Time column in the **Group by** section, you can optionally group the data to a specified interval.

Interval

Hour

Day

Week

Month

Quarter

Year

Note: If you select a Date and Time column in the **Category (X) Axis** section and select **Month** or **Quarter** in the **Interval** section, a [**<Date and Time Column Name>_Year**] option will appear in the Group by dropdown list.

This column helps to compare your business data within the same month or quarter for all previous years.

To understand how to use this column to analyze your business data, please refer to section [10. Use Case](#) for details.

- h. Click the **Save Settings** button to save the configurations.
- i. Click the **Close Settings** button to close the settings panel.

4.2.4 Filter Data on Web Part

After creating a chart on the Web Part, you can filter data to generate the desired chart dynamically.

- a. To setup a filter, click Display Filter button to expand filter panel.

- b. In the Filter panel, specify a filter criteria.

- Select one column in the first drop-down menu.

- And select one operator from the middle drop-down menu, and specify a value.
- Click the button to add more filter criteria.
 - Click **Filter** button.
 - Then the chart will be created using the filter data.

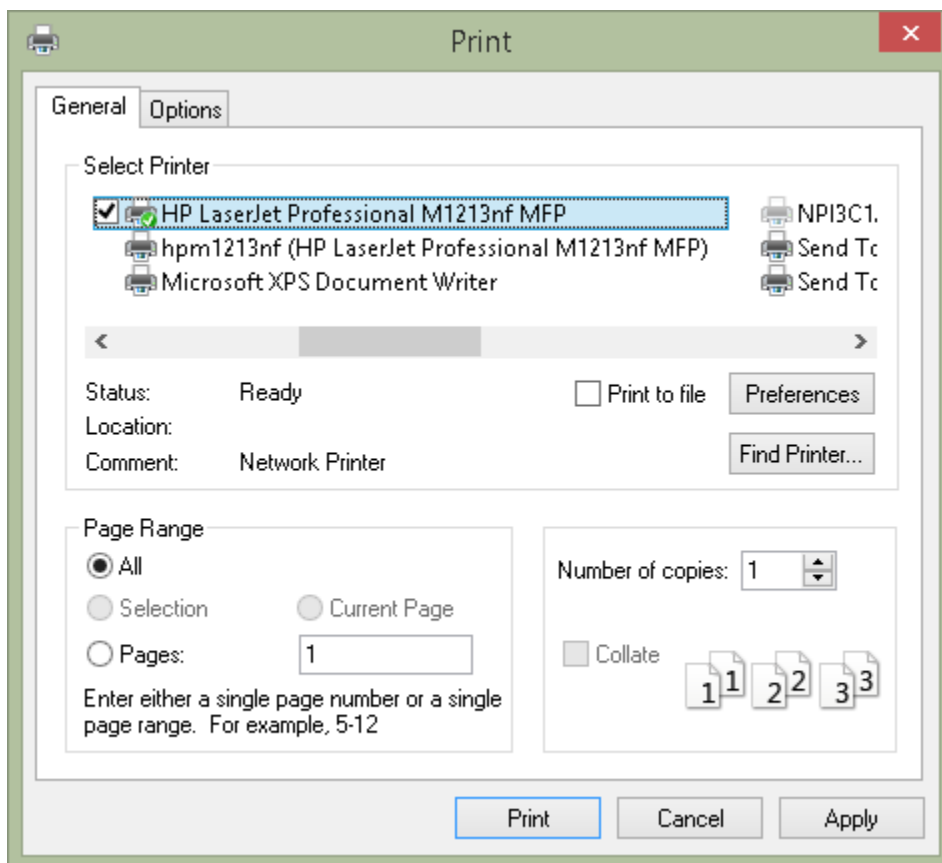

4.2.5 Print a Chart on Web Part

After creating a chart on the Web Part, you can print it on the page.

To print a chart, , find the **Print** button on the Business Charts Web Part, and click Print.

In explorer Print window, click Print button to print the chart.

5. Modify or Delete a Chart

This section will show you how to modify or delete a chart in Business Charts Web Part or list.

5.1 Modify a Chart

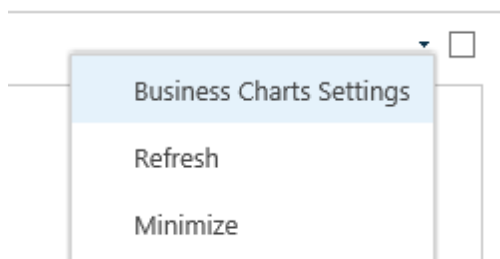

To modify a chart, you must have at least **Design** permission level.

To modify a chart in list

- Enter the list which you want to modify a chart and click **Business Charts** under the List tab.
- Select the chart you want to change and click the  button on the top right corner.
- Make the changes as you want.
- Click **Save Settings** to save changes.
- Click **Close Settings** to close the settings panel.

To modify a chart on the Web Part

- Hover over the Business Charts Web Part to reveal the blue arrow on the top right corner of the web part. Click on the arrow to open a drop down menu and click on **Business Charts Settings**.

- In the **Business Charts Settings** page, select the chart you want to modify.
- Make the changes as you want.
- Click **Save Settings** to save changes.
- Click **Close Settings** to return to the Web Part page.

5.2 Delete a Chart

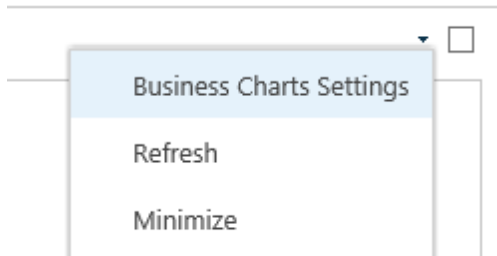

To delete a chart you must have at least **Design** permission level.

To delete a chart in list

- Enter the list which you want to modify a chart and click **Business Charts** under List tab.
- Select the chart you want to delete and click the  button on the top right corner.
- A message box will appear asking if you are sure you want to delete the chart.
- Click **OK** to confirm the deletion.

To delete a chart on the Web Part

- Hover over the Business Charts Web Part to reveal the blue arrow on the top right corner of the web part. Click the arrow to open a drop down menu and click on **Business Charts Settings**.

- In the **Business Charts Settings** page, select the chart you want to delete.
- Click the  button on the top right corner.
- A message box will appear asking if you are sure you want to delete the chart.
- Click **OK** to confirm the deletion.

6. Filter Data to Display on Chart

This function allows you to specify criterias to filter data to display on the chart. With this function, you can narrow your data selection.

For Business Charts Web Part, this function is only available when the data source is SharePoint list.

- a. In the **Business Charts Settings** page, expand the **Filter** section.
- b. Select the checkbox next to **Enable Filter** to enable this function.
- c. Select one column or field and operator and then specify a value to compare.

The screenshot shows a 'Filter' section with a dropdown arrow on the left. Below it, the checkbox 'Enable Filter' is checked. A single filter rule is displayed: 'Product Name' (with a dropdown arrow), 'is equal to' (with a dropdown arrow), and 'Business Charts' (in a text box). To the right of the text box are two buttons: a minus sign '-' and a plus sign '+'. The plus sign is highlighted.

- d. To add more filters, click to add a filter (click to delete a filter).

The screenshot shows the 'Filter' section with 'Enable Filter' checked. Two filter rules are stacked vertically. The first rule is 'Product Name is equal to Business Charts'. The second rule starts with an 'And' operator (with a dropdown arrow), followed by 'Total Amount' (with a dropdown arrow), 'is greater than' (with a dropdown arrow), and '100000' (in a text box). To the right of the second rule's text box are two buttons: a minus sign '-' and a plus sign '+'. The plus sign is highlighted.

- e. Click the **Save Settings** button to save the configurations.

Supported columns and operators:

Operator	Description	Note
Equal to	Column value is equal to the specified value.	For Yes/No and

	<p>Columns: Date and Time, Number, Currency, Single line of text, Hyperlink or Picture, Managed Metadata, Person or Group, Content Type, Yes/No, Attachment, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	Attachment columns, the value should be True or False.
	Column value does not equal to the specified value.	
Not equal to	<p>Columns: Date and Time, Number, Currency, single line of text, Hyperlink or Picture, Managed Metadata, Person or Group, Content Type, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	
	Begins with a specified character.	
Begins with	<p>Columns: Single line of text, Hyperlink or Picture, Managed Metadata, Person or Group, Content Type, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	
	Contains specific characters anywhere in the text.	
Contains	<p>Columns: Single line of text, Hyperlink or Picture, Managed Metadata, Person or Group, Content Type, Multiple line of text, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	
	Column value is less than a specified value.	
Less than	<p>Columns: Calculated, Date and Time, Number, Currency, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	
	Column value is greater than a specified value.	
Greater than	<p>Columns: Calculated, Date and Time, Number, Currency, Calculated, Lookup, Cascaded Lookup, Cross-Site Lookup</p>	

7. Change Appearance

After a chart is created, you can change the axis title, label and add animation effects.

- a. Open the **Business Charts Settings** panel and expand the **Appearance** section.

▼ Appearance

Value (Y) Axis Title

Category (X) Axis Title

Display Labels

Specify the number of decimal places in the label: ▼

Enable Animation

- b. In the **Value (Y) Axis Title** section, specify a short title to display on the x axis of the chart.
- c. In the **Category (X) Axis Title** section, specify a short title to display on the y axis of the chart.
- d. Specify if you want to display labels on the chart and specify the number of decimal places in the label.
- e. Specify if you want to enable animation effects while loading the chart.
- f. Click the **Save Settings** button to save the configurations.

8. Miscellaneous

8.1 Default Chart

In Business Charts, you can create multiple charts based on your need. There is not option to specify the default chart to display.

Business Charts will consider the chart which was last modified as the default.

8.2 View Charts

Business Charts allows you to create multiple charts to meet your needs or business requirements. To view another chart, select the chart name in the **Charts** drop-down list.

8.3 Export Data to a CSV file

After a chart has been created, you can export the data to a CSV file.

Quarter	Total Amount
Q1	341366
Q2	221276
Q3	315827
Q4	232588

- Click the  button on the right top corner of the page.
- Specify the location to save the file to and click **OK**.

9. Use Case

You are a sales specialist and you record product orders to a SharePoint list. Your supervisor wants you to compare the sales data, by quarter, for 2013 and 2014.

All Items ... 

✓	Order ID	Product Name	Total Amount	Date Fulfilled	Region
	ORD-232-A3E2	DocShare	\$799.00	3/1/2014	Europe
	ORD-232-A3E3	DocShare	\$1,099.00	3/7/2014	North America
	ORD-232-A3E4	DocMerger	\$699.00	4/9/2014	Asia
	ORD-232-A3E5	DocViewer	\$1,099.00	4/10/2014	Europe
	ORD-232-A3E6	DocMerger	\$699.00	5/3/2014	North America
	ORD-232-A3E7	DocShare	\$799.00	5/15/2014	Asia
	ORD-232-A3E8	DocShare	\$799.00	5/28/2014	Europe
	ORD-232-A3E9	DocViewer	\$1,899.00	6/6/2014	North America
	ORD-106-L4N0	DocShare	\$799.00	6/28/2014	Asia
	ORD-106-L4N1	DocViewer	\$1,899.00	7/8/2014	Europe
	ORD-106-L4N2	DocMerger	\$699.00	7/28/2014	North America

To create a chart that meets your requirement, follow these steps:

- First enter the Sales Order List and click on **Business Charts** under the List tab.
- In the Business Charts dialog, click the **Add a new chart** button.
- In the Basic Settings section, specify the following settings:

Chart Name: Specify a name for this chart.

List View: Select All Items to generate a chart.

Chart Type: Select a column chart to display your data.

Value (Y) Axis: Select the Total Amount column and select the SUM function.

Category (X) Axis: Select the Date Fulfilled column to display on the x axis.

Interval: Specify the interval as Quarter.

Group by: Select **[Date Fulfilled_Year]**.

Value (Y) Axis *
Select one column you want to display for the y axis of the chart.

Total Amount SUM

Category (X) Axis *
Select one column you want to display for the x axis of the chart.

Date Fulfilled

Interval

Hour

Day

Week

Month

Quarter

Year

Group by
Specify a column by which to group data.

[Date Fulfilled_Year]

d. In the Filter section, specify the criteria to filter data:

Filter

Enable Filter

Date Fulfill is less than 1/1/2015

And Date Fulfill is greater than 1/1/2013

e. In the Appearance section, specify the title for the x and y axis as follows:

▼ Appearance

Value (Y) Axis Title

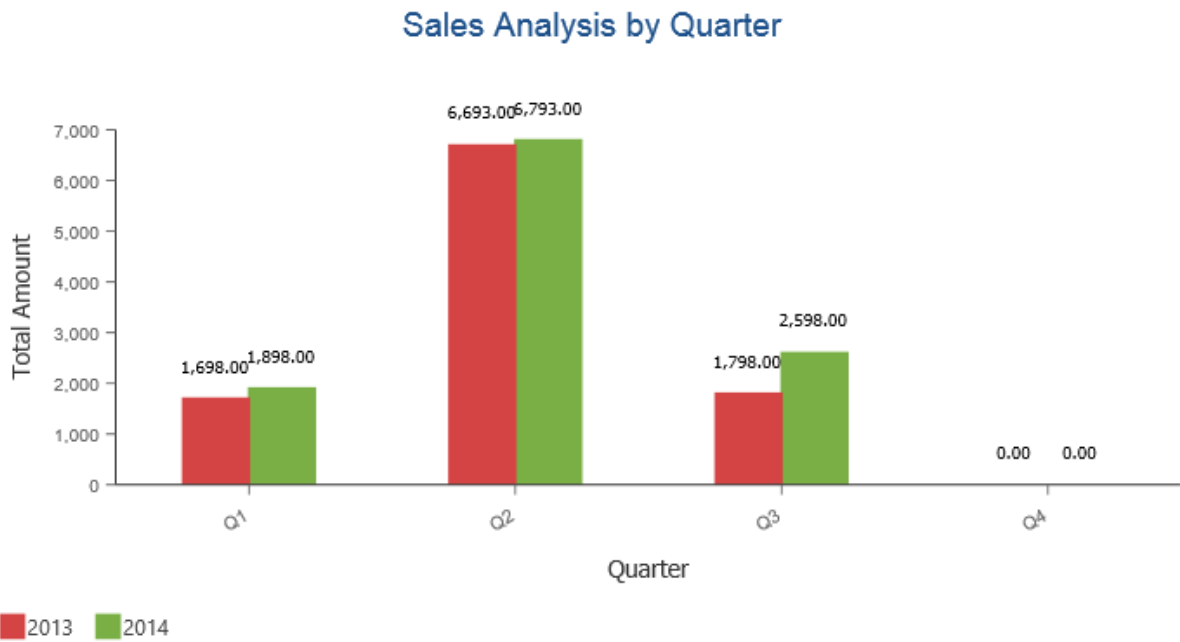

Category (X) Axis Title

Display Labels

Specify the number of decimal places in the label:

Enable Animation

- f. Click **Save Settings** to save the settings.
- g. You will get a chart that looks like this:

Close

In order for BoostSolutions to create a license for you, you MUST send us your SharePoint environment identifier (Note: different license types need different information). A server license needs a server code; a Farm license needs a farm ID; and a site collection license needs a site collection ID.

- Send the above information to us (sales@boostsolutions.com) to generate a license code.

License Registration

- a. When you receive a product license code, enter the **License Management Center** page.
- b. Click **Register** on the license page and a **Register or Update license** window will open.

Register or Update license

Please upload a license code file or enter the license code to activate the product.

Upload a license code file

Enter license code

- c. Upload the license file or enter the license code and click **Register**. You will get confirmation that your license has been validated.

Registered Successfully

Registered Successfully

- ▶ The license was verified successfully.
- ▶ Thank you for choosing BoostSolutions.

If you encounter any problems or would like to suggest a product requirement, please contact support@boostsolutions.com
