

SharePoint Text Size Zoom Tutorial

When you have to work with SharePoint sites several hours per day, it can be exhausting and difficult to read the content in text-heavy documents. But, with SharePointBoost's Text Size Zoom web part, reading large quantities of text is more manageable. It provides a user-friendly way to make SharePoint sites more accessible, which especially useful if people with different reading habits are accessing your page. Everybody can adjust the size of the text so that they feel comfortable reading it.

To use it, first add the web part onto the page.

Then select SharePointBoost Text Size Zoom and click "Add."

Once this is done, you can find the web part on your page. You can change the size of all the text on your page according to your preferences.

Export and import Alert Part as template		•
Alert/Reminder email contents are displayed as strikethrough where contents are deleted and highlighted where contents are newly added		•

Feature List [Learn more](#)

1. Unique SharePoint Reminder workflow, monitoring your schedules and sending reminder emails to you.

If users want to send SharePoint reminder emails for upcoming deadlines, overdue items, or change of item statuses, SharePoint 2007 "Alert Me" cannot provide such functionality. With SharePoint Reminder Boost, these requirements can be fulfilled. SharePoint Reminder Boost acts like an alarming clock to send you SharePoint email notifications. For instance, if users want to send SharePoint reminder email on the date exact 30 days before an expiration date, they could use the expression as "[Expiration Date] == AddDays([Today], 30)" when setting up the SharePoint Reminder Workflow. If users want to send SharePoint reminder email every day from 30 days ahead to the expiration date, they could set the expression as "[Expiration Date] <= AddDays([Today], 30) && [Expiration Date] >= [Today]" in SharePoint Reminder Boost.

2. SharePoint Alert Reminder Boost provides more customizable email notification sending targets, including user/group field columns, email addresses, email columns, and AD users/groups.

So if you feel like the text size is too big, just decrease the text size by clicking the smallest button of the web part. The smallest font size will be indicated by graying out the **decrease font size** button.
